Millwork ~ Homes ~ Restoration

Hull Tour: Winterthur Museum - Georgian High Style

Brent takes you on a tour through **Winterthur**, the preeminent collection of American antiques and architecture. He covers High Georgian Style and the various details that make this architectural style so unique. Follow along and be inspired by the past to build better and more beautifully today.

Featured Project: Rivercrest Residence

Check out this month's featured project: **Rivercrest Residence**. This new old house in Fort Worth was inspired by the iconic Drayton Hall, a classical Georgian style house on the National Register of Historic Places. Hull Homes used traditional building methods: wood-molded bricks laid with five course English bond. The house Hull built tells a story of three generations who added on to the original proud building over time.
