

HULLWORKS

Millwork ~ Homes ~ Restoration

House Tour: Historic Farmhouse

Brent visits an exciting new project north of Houston. Follow along as he takes us through the **original farmhouse** with one part dating back to the 1870's. During the tour, Brent talks about the job ahead and how Hull plans to handle the restoration.

Featured Project: Texas State Cemetery Caretaker's Cottage

Check out this month's featured project: The [Texas State Cemetery Caretaker's Cottage](#). This structure was built in 1915 as part of the Cemetery's restoration and beautification.

After 100 years it needed maintenance and repair. Production windows had replaced the originals in the late 1990s which had already worn out. In collaboration with Phoenix 1 Restoration & Construction, Hull Millwork built custom [100 Year Windows](#) which are new, historically authentic wood windows and more appropriate for this historic cottage.
